

YONGBAE HONG

IT Support & Operations Professional | Full-Stack Web Development

 codingyongbae@gmail.com  yongbaehong.github.io/global-portfolio/  Pyeongtaek / Osan, Gyeonggi-do

PROFESSIONAL SUMMARY

U.S.-educated operations professional with hands-on experience supporting U.S. military customers in logistics operations, inventory control, documentation, customer service, and team leadership. MERN-stack development experience through hands-on applications and more than three years as a coding bootcamp teaching assistant troubleshooting full-stack issues in real time. Native English speaker with TOEIC 945/990. Currently expanding skills in AWS Cloud Practitioner and Figma. Seeking an English-speaking IT support, technical support, operations, logistics coordination, or technology-focused role with limited physical labor.

CORE STRENGTHS

- U.S. Military Customer Support
- Logistics & Inventory Operations
- Team Leadership
- Documentation & Quality Control
- Technical Troubleshooting
- MERN Stack
- Customer Communication
- Problem Solving
- Cross-functional Coordination

PROFESSIONAL EXPERIENCE

Hanjin Bespack Co., Ltd. — Logistics Team Lead Jan 2024 – Present | Pyeongtaek / Osan Air Base

- Lead a 3-person team supporting household-goods logistics for U.S. military personnel, coordinating daily operations and maintaining accurate inventory records.
- Communicate directly with U.S. military customers, document pre-existing shipment damage, and maintain detailed records to reduce claims and operational risk.
- Coordinate packing, loading, inventory verification, and customer-facing activities while maintaining safety, accuracy, and service standards.

Coding Bootcamp (CTE Coding) — Teaching Assistant Feb 2019 – May 2022

- Delivered live coding demonstrations and troubleshoot MERN-stack full-stack issues in real time, helping students understand application architecture and debugging.
- Created customized technical documentation and supplemental learning materials for students with different learning needs.

Healthcare Facility Maintenance — EVS Technician May 2022 – Jan 2024

- Maintained facility hygiene and chemical-safety procedures in accordance with OSHA and CDC-related requirements.
- Consistently met or exceeded room-turnaround targets in a high-pressure healthcare environment.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend	React, Next.js, Tailwind CSS, Redux
Backend	Node.js, Express, MongoDB, MySQL, RESTful APIs, Socket.io
Tools / DevOps	Git, GitHub, Docker, Expo, npm, Linux
Learning	AWS Cloud Practitioner, Figma

TECHNICAL PROJECTS

Mertier — Full-Stack Job Recruitment Platform MERN Stack

- Built a recruitment platform with authentication, job-posting workflows, responsive search, and dynamic filtering across thousands of simulated job records.

- Implemented React/Express filtering components and optimized REST API endpoints to reduce payload size and improve client-side performance.

Community Chat — Real-Time Messaging Application

MERN / Socket.io

- Built a real-time messaging application with chat-room creation, image sharing, and low-latency bidirectional communication.
- Integrated image uploads and optimized state updates for smooth media rendering.

EDUCATION & CERTIFICATIONS

- **College of the Redwoods** — Associate of Arts (A.A.), Behavioral Sciences
- **Coding Bootcamp** — Web Development Fundamentals & MERN Stack Program
- **TPC Training Certificate** — Facility Management & Chemical Safety (Units 151, 451-455)

LANGUAGES

- **English:** Native | **TOEIC:** 945 / 990 (July 2026)
